

# STANLEY SARFO PEPRAH

Software Engineering Graduate • Android Developer  
agyemangstanley1@gmail.com • London, SE14 6BW

## PERSONAL PROFILE

Recent BEng Software Engineering student at De Montfort University, targeting a first-class degree. Experienced in building fullstack Android applications using Kotlin, Firebase, and third-party APIs. Proven ability to manage complex projects independently from architecture through to testing and deployment. Reliable team player with strong communication skills gained across hospitality and direct fundraising roles.

## TECHNICAL SKILLS

|                  |                                                                  |
|------------------|------------------------------------------------------------------|
| Languages:       | Kotlin • Java • XML • SQL                                        |
| Android:         | Android Studio • App Remote SDK • Jetpack • Material Design      |
| Backend / Cloud: | Firebase Firestore • Firebase Auth • Spotify Web API • REST APIs |
| Tools:           | Git • GitHub • IntelliJ • Eclipse                                |

## PROJECTS

### VibeNSync — Social Music Intelligence App

*Final Year Dissertation, 2026*

- Built a full Android app in Kotlin integrating the Spotify Web API and App Remote SDK for real-time music playback and control
- Implemented a friend system with real-time activity feeds, compatibility scoring, Live Rooms, and mood-based playlist generation backed by Firebase Firestore
- Engineered a custom polling architecture (playAndConfirm) ensuring reliable playback sync with seek bar integration and auto-advance queue logic
- Resolved complex auth bugs and delivered a fully redesigned animated UI; managed full development lifecycle via Git/GitHub, tested on physical hardware

### Student Login and Module Selection Application

*September 2024*

- Built a Java Swing desktop application with tabbed navigation for student login, profile management, and module selection
- Focused on clean UI design with input validation and smooth state transitions

### Grid-Based Game

*April 2024*

- Developed a progressive-difficulty game with obstacle avoidance, point collection, and custom scoring logic in IntelliJ IDE

## WORK EXPERIENCE

### Fundraising Assistant

Smile Fundraising, Leicester

*April 2026 – May 2026*

- Engaged the public in face-to-face conversations to raise awareness and support for charitable causes
- Demonstrated resilience, strong verbal communication, and the ability to build rapport quickly

### Waiter

Dukes Hotel, London

*June 2022 – August 2023*

- Delivered high-quality dining experiences through attentive, friendly service in a fast-paced environment
- Engaged guests to recommend seasonal specials, maintaining strong customer satisfaction and presentation standards

### Pharmacy Trainee

Krisons Chemist, London

September 2021 – May 2022

- Assisted with dispensing prescriptions and handled customer medication enquiries professionally
- Monitored medication expiration dates and supported inventory management for compliance and safety

## EDUCATION

---

### **BEng Software Engineering**

2022 – Present • Targeting First-Class Honours

De Montfort University, Leicester

- Key modules: Operating Systems and Networks, Database Design and Implementation, Design and Development

### **A Levels**

Haberdashers' Aske Hatcham College

- Psychology (A) • Sports Science BTEC (Merit) • Business BTEC (Distinction)

## INTERESTS

---

Music production and sound engineering • Football and gym • Android app development • AI and software trends
