

STANLEY SARFO PEPRAH

Software Engineering Graduate • Android • Web • Full Stack
agyemangstanley1@gmail.com • London, SE14 6BW • agyemstan4.github.io

PERSONAL PROFILE

Recent BEng Software Engineering graduate from De Montfort University, targeting a First-Class Honours degree. Experienced across the full software development stack from Android and mobile development in Kotlin to frontend web interfaces in HTML, CSS, and JavaScript, backend cloud services via Firebase, and REST API integration. A proven project builder who delivers complete, user-facing applications independently. Fast learner, strong eye for UI/UX, and eager to grow within any collaborative engineering environment whether that is mobile, frontend, backend, or full stack.

TECHNICAL SKILLS

Languages: Kotlin • Java • JavaScript • HTML • CSS • XML • SQL
Mobile: Android Studio • Jetpack • App Remote SDK • Material Design • MVVM
Backend / Web: Firebase Firestore • Firebase Auth • Spotify Web API • REST APIs • Node.js (basic)
Tools: Git • GitHub • GitHub Pages • IntelliJ • Eclipse • Figma (basic)

PROJECTS

- Personal Portfolio Website** 2026
- Designed and built a responsive developer portfolio using HTML, CSS, and JavaScript, hosted on GitHub Pages
 - Implemented a dark neon aesthetic with smooth animations and a mobile-responsive layout to showcase projects and skills
 - Live at agyemstan4.github.io, demonstrating frontend development and deployment skills
- VibeNSync Social Music Intelligence App** *Final Year Dissertation, 2026*
- Built a full Android app in Kotlin integrating the Spotify Web API and App Remote SDK for real-time music playback and control
 - Implemented a friend system with real-time activity feeds, Jaccard compatibility scoring, Live Rooms, and mood-based playlist generation backed by Firebase Firestore
 - Engineered a custom polling architecture (playAndConfirm) ensuring reliable playback sync with seekbar integration and auto-advance queue logic
 - Resolved complex OAuth/PKCE auth bugs and delivered a fully redesigned animated UI; managed full development lifecycle via Git/GitHub, tested on physical hardware
- Smart Home Environmental Monitor** 2026
- Built an IoT environmental monitoring system using NodeMCU ESP8266, DHT11 sensor, and real-time cloud dashboards via ThingSpeak and Blynk
 - Demonstrated full hardware to cloud integration including sensor data collection, Wi-Fi transmission, and live remote monitoring
- Cafe Ordering App** 2025
- Built a fully functional Android cafe ordering app in Kotlin with a browsable menu, add to basket, quantity controls, and clear basket functionality
 - Implemented a singleton CartManager class handling item state, duplicate detection, quantity increment/decrement, and cart clearing
 - Focused on clean UI design and smooth user experience, inspired by real-world retail apps
- Student Login and Module Selection Application** *September 2024*
- Built a Java Swing desktop application with tabbed navigation for student login, profile management, and module selection
 - Focused on clean UI design with input validation and smooth state transitions

WORK EXPERIENCE

- Fundraising Assistant** *April 2026 – May 2026*
Smile Fundraising, Leicester
- Engaged the public in face-to-face conversations to raise awareness and support for charitable causes
 - Demonstrated resilience, strong verbal communication, and the ability to build rapport quickly
- Waiter** *June 2022 – August 2023*
Dukes Hotel, London
- Delivered high-quality dining experiences through attentive, friendly service in a fast-paced environment
 - Engaged guests to recommend seasonal specials, maintaining strong customer satisfaction and presentation standards
- Pharmacy Trainee**

Krisons Chemist, London

September 2021 – May 2022

- Assisted with dispensing prescriptions and handled customer medication enquiries professionally
- Monitored medication expiration dates and supported inventory management for compliance and safety

EDUCATION

BEng Software Engineering

2022 – Present • Targeting First-Class Honours

De Montfort University, Leicester

- Key modules: Operating Systems and Networks, Database Design and Implementation, Embedded Systems and IoT, Software Design and Development

A Levels

Haberdashers' Aske Hatcham College

- Psychology (A) • Sports Science BTEC (Merit) • Business BTEC (Distinction)

INTERESTS

Music production and sound engineering • Football and gym • Android app development • AI and software trends
